

Aurora Spine Corporation Announces Release of its Hydra Osteo Onyx Lumbar System

CARLSBAD, Calif., Oct. 15, 2024 — Aurora Spine Corporation (“Aurora Spine” or the “Company”) (TSXV: ASG) (OTCQB: ASAPF), a designer and manufacturer of innovative medical devices that improve spinal surgery outcomes, today announced it has launched its new OSTEO ONYX™ lumbar fusion system, promoting Rough Surface Technology (RST).

“We are excited to introduce another procedural solution that accommodates not only standard spine patients but the most challenging patients who are also in need of care. The Hydra Osteo Onyx open and MIS systems give Surgeons the opportunity to treat patients who have osteopenia or osteoporosis, as well as their healthier patients”, said Ron Eckels, US Director of Spine with Aurora Spine.

Dr. Daniel Barba of San Diego, CA was the first surgeon to use the Hydra Osteo Onyx MIS System in the United States. Dr. Barba stated “The Osteo Onyx roughened surface technology provides a great purchase within the pedicle that creates a benefit to patients with osteoporosis or poor bone quality. In addition, the range of MIS screws (4.5mm up to 10.5mm) allow me to accommodate any patient with a minimally invasive procedure which leads to better patient recovery and satisfaction”.
