

Aurora Spine to Attend the American Association of Neurological Surgeons Annual Meeting

Carlsbad, Calif., April 19, 2023 — Aurora Spine Corporation (“Aurora Spine” or the “Company”) (TSXV:ASG) (OTCQB: ASAPF), a designer and manufacturer of innovative medical devices that improve spinal surgery outcomes, today announced that it will be attending the 2023 American Association of Neurological Surgeons (AANS) Annual Scientific Meeting. The meeting will be held at April 21-24, 2023, at the Los Angeles Convention Center – Booth #1011.

At this year’s AANS event, Aurora Spine will be highlighting its product line, including DEXA-C™, a cervical cage for anterior cervical discectomy with fusion (ACDF) procedures. DEXA-C features Aurora’s patented DEXA Technology™ that creates a series of implants manufactured with varying densities to match a patient’s bone density and DEXA T-Score.

As part of the AANS meeting, Dr. Sebastian Koga, a neurosurgeon at Forrest Health Institute of Neuroscience, will deliver a presentation titled ‘Comparative Subsidence Analysis Between 3D Printed Bone Density Matched Titanium and PEEK Cervical Interbody Fusion Devices’ will be delivered on Sunday, April 23rd at 2pm.

The company will showcase its SiLO TFX™ SI Fusion System. The patented, minimally invasive SiLO TFX MIS Sacroiliac Joint Fixation System is intended for sacroiliac joint fusion for conditions including sacroiliac joint disruptions and degenerative sacroiliitis. The SiLO TFX MIS Sacroiliac Joint Fixation System includes a Transfixing-Cone, an ilium screw, a sacrum screw and associated instrumentation. The SiLO TFX implants are designed to transfix the sacrum and ilium, providing stability for bony fusion. The company will also be displaying its line of ZIP products, which offer the Screwless Procedure and enables MIS Interspinous fusion without the use of a screw set.

Mr. Trent Northcutt, Aurora’s President, CEO and co-founder, stated, “We are excited to be attending this year’s AANS, where many of the country’s top neurological surgeons gather to learn about new products and procedures within the industry. This meeting is a great setting for Aurora to meeting up with doctors seeking newer technologies to incorporate into their procedures, like the DEXA-C, which has a proprietary design and technology, and can be used to match with a patient’s bone density, something other cages currently on the market do not consider. We are also looking forward to Dr. Koga’s presentation which will demonstrate the strength of the DEXA-C device and its superior performance to PEEK cages currently being implanted.”

About Aurora Spine

Aurora Spine is focused on bringing new solutions to the spinal implant market through a series of innovative, minimally invasive, regenerative spinal implant technologies. Additional
