

Aytu BioPharma Announces Highest Weekly Adzenys XR-ODT® Prescriptions Generated Since Inception of RxConnect

Adzenys XR-ODT Total Prescription (TRx) Unit Growth Driven by a Combination of Continued Sales Force Execution, Leveraging of the Aytu RxConnect Patient Support Program, and a Positive Response to the Adderall® XR Supply Disruption

Adzenys XR-ODT is the Only FDA-Approved, Extended-Release, Orally Disintegrating Tablet Formulation of Amphetamine

Adzenys XR-ODT Continues to be Available as an FDA-Approved Bioequivalent Alternative to Adderall XR

ENGLEWOOD, CO / November 30, 2022 / Aytu BioPharma, Inc. (the Company or “Aytu”) (NASDAQ:AYTU), a commercial stage pharmaceutical and consumer health company providing pediatric-focused prescription drugs and cost-effective consumer health solutions, today announced the highest weekly prescription total for Adzenys XR-ODT® (amphetamine) extended-release orally disintegrating tablets, CII, since the inception of the Aytu RxConnect patient support program.

For the week ending November 18, 2022, a record 5,186 total prescriptions were filled for Adzenys XR-ODT. Adzenys XR-ODT prescriptions are up 9.9% over the preceding thirteen-week period.

Adzenys XR-ODT has a twelve-hour duration of action, has been FDA-approved as bioequivalent to Adderall® XR, and is available in six equivalent strengths as follows:

	Strength (mg)					
Adzenys XR-ODT	3.1	6.3	9.4	12.5	15.7	18.8
Adderall XR	5	10	15	20	25	30

Josh Disbrow, Chief Executive Officer of Aytu, said, “We’re pleased with the continuing growth of Adzenys XR-ODT, driven in part through our sales team’s execution in the field and our messaging to clinicians. Specifically, we continue to inform our clinician partners that Adzenys XR-ODT, an FDA-approved bioequivalent alternative to Adderall XR, continues to be available for their patients. Given the continuing supply disruptions many patients and clinicians have faced this fall and may face into 2023, we’re pleased to offer Adzenys XR-ODT as a potential alternative to Adderall XR. Access to Adzenys XR-ODT is simple, convenient, and cost effective for patients via the Aytu RxConnect program and our network of approximately 1,000 pharmacies nationwide.”

Adzenys XR-ODT remains available in light of numerous reported supply disruptions affecting generic Adderall XR (mixed salts amphetamine) extended-release capsule, CII for the treatment of attention deficit hyperactivity disorder (ADHD). Aytu BioPharma has maintained consistent Adzenys XR-ODT production levels at its Grand Prairie, Texas manufacturing facility to ensure ongoing supply of Adzenys XR-ODT, which has experienced no supply disruptions to date.

About Adzenys XR-ODT

What is Adzenys XR-ODT?

Adzenys XR-ODT is a central nervous system stimulant prescription medicine used for the treatment of ADHD in patients 6 years and older.

Important Safety Information

CONTRAINDICATIONS

- Known hypersensitivity to amphetamine or other ingredients in Adzenys XR-ODT. Angioedema and anaphylactic reactions have been reported in patients treated with other amphetamine products.
- Taking a monoamine oxidase inhibitor (MAOI), or have taken an MAOI within the past 14 days. Hypertensive crisis can occur.

Important Safety Information

Adzenys XR-ODT is a federally controlled substance (CII) because it can be abused or lead to dependence. Keep Adzenys XR-ODT in a safe place to prevent misuse and abuse. Selling or giving away Adzenys XR-ODT may harm others and is against the law.

Tell your doctor if you or your child has ever abused or been dependent on alcohol, prescription medicines, or street drugs.

Who should not take Adzenys XR-ODT?

Do not take Adzenys XR-ODT if you or your child is:

- allergic to amphetamine or any ingredients in Adzenys XR-ODT.
- taking or has taken an anti-depression medicine called monoamine oxidase inhibitor (MAOI) within the past 14 days.

Adzenys XR-ODT is a stimulant medicine. Tell your doctor about health conditions, including if:

- you or your child has any heart problems, heart defects, high blood pressure, or a family history of these problems. This is important because sudden death has occurred in people with heart problems or defects, and sudden death, stroke and heart attack have happened in adults. Your doctor should check for heart problems prior to prescribing Adzenys XR-ODT and will check you or your child's blood pressure and heart rate during treatment. Call the doctor right away if you or your child has any signs of heart problems such as chest pain, shortness of breath, or fainting while taking Adzenys XR-ODT.
- you or your child has mental problems, or a family history of suicide, bipolar illness, or depression. This is important because the following could occur: new or worse behavior and thought problems, new or worse bipolar illness, new psychotic symptoms (hearing voices, believing things that are not true, are suspicious) or new manic symptoms. Call the doctor right away if there are any new or worsening mental symptoms during treatment.
- you or your child has circulation problems in fingers and toes (peripheral vasculopathy, including Raynaud's phenomenon). Fingers or toes may feel numb, cool, painful, sensitive to temperature and/or change color from pale, to blue, to red. Call the doctor right away if any signs of unexplained wounds appear on fingers or toes while taking Adzenys XR-ODT.
- your child is having slowing of growth (height and weight). Your child should have his or her height and weight checked often while taking Adzenys XR-ODT. The doctor may stop treatment if a problem is found during these check-ups.
- you or your child has kidney problems. Your doctor may lower the dose.
- you or your child is or plans to become pregnant.
- you or your child is breastfeeding or plans to breastfeed. You should not breastfeed while taking Adzenys XR-ODT.
- you or your child takes any medicines, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Adzenys XR-ODT and some medicines may interact with each other and cause serious side effects.
- Do not start any new medicine while taking Adzenys XR-ODT without talking to your doctor first.

What should I avoid while taking Adzenys XR-ODT?

- drinking alcohol

Common side effects of Adzenys XR-ODT include:

- Decreased appetite and problems sleeping.
- Children 6 - 12 Years also include: Stomach pain, extreme mood change, vomiting, nervousness, nausea, and fever.
- Children 13 - 17 Years also include: Stomach pain and weight loss.
- Adults also include: Dry mouth, headache, weight loss, nausea, anxiety, restlessness, dizziness, fast heart beat, diarrhea, weakness, and urinary tract infections.

These are not all the possible side effects of Adzenys XR-ODT. Call your doctor for medical advice about side effects.

For additional safety information, click here for Prescribing Information and Medication Guide and discuss with your doctor.

To report suspected adverse reactions, contact Aytu BioPharma at 855-AYTU-BIO (855-298-8246). You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

About ADHD

According to the Centers for Disease Control and Prevention, ADHD is one of the most common childhood disorders and can continue through adolescence and adulthood. In fact, ADHD is estimated to affect 5 percent of children and 2.5 percent of adults in the U.S. Symptoms include inattentiveness, hyperactivity and impulsiveness. These patterns of behavior are seen in many settings (school, home, work) and can impact performance and relationships.

Stimulant medications such as amphetamine and methylphenidate are the standard of care for treating ADHD, and extended-release (XR) formulations of these medications allow for once-daily dosing. Most of the existing treatment formulations are tablets or capsules, which need to be swallowed intact or in some cases sprinkled on certain foods or fluids and ingested immediately. Orally disintegrating tablets differ from traditional tablets and capsules in that they are designed to disintegrate in the mouth, rather than being swallowed whole.
