

## **Comstock Metals Advances Industry-scale Facility Commissioning**

VIRGINIA CITY, Nev., March 03, 2026 (GLOBE NEWSWIRE) — Comstock Inc. (NYSE: LODE) (“Comstock” and the “Company”) and Comstock Metals LLC (“Comstock Metals”), a leader in the responsible recycling of end-of-life solar panels with the only certified, North American, zero-landfill solution, announced today that significant portions of the industry-scale facility precision equipment, manufactured on proprietary specifications, has arrived at our Silver Springs, Nevada location for installation, testing and ultimate integration of the 100,000 ton per year solar panel recycling production line. Commissioning will continue through March 2026, and into early April with operations planned during the second quarter of this year.

The manufacture of precision-machined equipment for Comstock Metals’ proprietary solar panel recycling begins with a highly engineered design process focused on durability, accuracy, speed, and maximizing throughput. Each system is modeled using advanced CAD platforms to ensure exact tolerances for shredding, conditioning, and ultimately, critical materials separation and recovery. The shredding systems are currently being assembled.

“Our team is now fully deployed and engaged in every aspect of our facility upgrades, storage build out and the all of the work associated with commissioning our first industry-scale recycling process and we have now received the major front-end components of our proprietary shredding systems,” said Dr. Fortunato Villamagna, President of Comstock Metals. “Installation involves a plurality of activities, from complex tasks like the interconnection of the various unit operations, completing the communication interfaces between the various systems, to things as simple as precision leveling, anchoring to reinforced and epoxied flooring, operational and electrical integration with facility power infrastructure, and calibration of automated control systems. Our design allows us to commission and evaluate each unit operation independently as they are installed, effectively streamlining the process and accelerating the full start-up and eventual ongoing, continuous operations.”

Final receipt and integration of all major components will continue through March and into April when the Company will confirm operational efficiencies, safety compliance, and optimized workflows within the dedicated recycling platform. The Company remains on schedule for continuous operations during the second quarter.

The Company has also completed and submitted its first major operating permit application with the State of Nevada for our second, integrated, industry-scale facility located in Clark County, in southern Nevada and has also begun the engagement with the city, county, and surrounding industrial neighbors and community.

“Our disciplined approach with technology and systems readiness required a multi-year operation of the commercial demonstration facility, enabling this final, first of its kind design

and ordering of the industrial-scale systems,” said Corrado De Gasperis, Executive Chairman and CEO of Comstock. “The ‘unit operation model’ deployed in the commercial demonstration facility is what enabled the Company to independently commission each part of the full scale plant independently, streamlining start-up. The project for readying, receiving, and commissioning this facility in Silver Springs is in full swing with frequent updates forthcoming on commissioning.”

## **About Comstock Inc.**

Comstock Inc. (NYSE: LODE) innovates and commercializes technologies, systems and supply chains that enable, support and sustain clean energy systems by efficiently, effectively, and expediently extracting and converting under-utilized natural resources into reusable metals, like silver, aluminum, gold, and other critical minerals, primarily from end-of-life photovoltaics. ## **Forward-Looking Statements**

This press release and any related calls or discussions may include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, are forward-looking statements. The words “believe,” “expect,” “anticipate,” “estimate,” “project,” “plan,” “should,” “intend,” “may,” “will,” “would,” “potential” and similar expressions identify forward-looking statements but are not the exclusive means of doing so. Forward-looking statements include statements about matters such as: future market conditions; future explorations or acquisitions; divestitures, spin-offs

or similar distribution transactions, future changes in our research, development and exploration activities; future financial, natural, and social gains; future prices and sales of, and demand for, our products and services; land entitlements and uses; permits; production capacity and operations; operating and overhead costs; future capital expenditures and their impact on us; operational and management changes (including changes in the Board of Directors); changes in business strategies, planning and tactics; future employment and contributions of personnel, including consultants; future land and asset sales; investments, acquisitions, divestitures, spin-offs or similar distribution transactions, joint ventures, strategic alliances, business combinations, operational, tax, financial and restructuring initiatives, including the nature, timing and accounting for restructuring charges, derivative assets and liabilities and the impact thereof; contingencies; litigation, administrative or arbitration proceedings; environmental compliance and changes in the regulatory environment; offerings, limitations on sales or offering of equity or debt securities, including asset sales and associated costs; business opportunities, growth rates, future working capital, needs, revenues, variable costs, throughput rates, operating expenses, debt levels, cash flows, margins, taxes and earnings. These statements are based on assumptions and assessments made by our management in light of their experience and their perception of historical and current trends, current conditions, possible future developments and other factors they believe to be appropriate. Forward-looking statements are not guarantees, representations or warranties and are subject to risks and uncertainties, many of which are unforeseeable and beyond our control and could cause actual results, developments, and business decisions to differ materially from those contemplated by such forward-looking statements. Some of those risks and uncertainties include the risk factors set forth in our filings with the SEC and the following: adverse effects of climate changes or natural disasters; adverse effects of global or regional pandemic disease spread or other crises; global economic and capital market uncertainties; the speculative nature of gold or mineral exploration, and lithium, nickel and cobalt recycling, including risks of diminishing quantities or grades of qualified resources; operational or technical difficulties in connection with exploration, metal recycling, processing or mining activities; costs, hazards and uncertainties associated with precious and other metal based activities, including environmentally friendly and economically enhancing clean mining and processing technologies, precious metal exploration, resource development, economic feasibility assessment and cash generating mineral production; costs, hazards and uncertainties associated with metal recycling, processing or mining activities; contests over our title to properties; potential dilution to our stockholders from our stock issuances, recapitalization and balance sheet restructuring activities; potential inability to comply with applicable government regulations or law; adoption of or changes in legislation or regulations adversely affecting our businesses; permitting constraints or delays; challenges to, or potential inability to, achieve the benefits of business opportunities that may be presented to, or pursued by, us, including those involving battery technology and efficacy, quantum computing and generative artificial intelligence supported advanced materials development, development of cellulosic

technology in bio-fuels and related material production; commercialization of cellulosic technology in bio-fuels and generative artificial intelligence development services; ability to successfully identify, finance, complete and integrate acquisitions, spin-offs or similar distribution transactions, joint ventures, strategic alliances, business combinations, asset sales, and investments that we may be party to in the future; changes in the United States or other monetary or fiscal policies or regulations; interruptions in our production capabilities due to capital constraints; equipment failures; fluctuation of prices for gold or certain other commodities (such as silver, zinc, lithium, nickel, cobalt, cyanide, water, diesel, gasoline and alternative fuels and electricity); changes in generally accepted accounting principles; adverse effects of war, mass shooting, terrorism and geopolitical events; potential inability to implement our business strategies; potential inability to grow revenues; potential inability to attract and retain key personnel; interruptions in delivery of critical supplies, equipment and raw materials due to credit or other limitations imposed by vendors; assertion of claims, lawsuits and proceedings against us; potential inability to satisfy debt and lease obligations; potential inability to maintain an effective system of internal controls over financial reporting; potential inability or failure to timely file periodic reports with the Securities and Exchange Commission; potential inability to list our securities on any securities exchange or market or maintain the listing of our securities; and work stoppages or other labor difficulties. Occurrence of such events or circumstances could have a material adverse effect on our business, financial condition, results of operations or cash flows, or the market price of our securities. All subsequent written and oral forward-looking statements by or attributable to us or persons acting on our behalf are expressly qualified in their entirety by these factors. Except as may be required by securities or other law, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. Neither this press release nor any related calls or discussions constitutes an offer to sell, the solicitation of an offer to buy or a recommendation with respect to any securities of the Company, the fund, or any other issuer.
