

## **Dyadic International's CEO Mark Emalfarb to Present at BIO CEO & Investor Conference**

JUPITER, Fla., Feb. 07, 2022 (GLOBE NEWSWIRE) — Dyadic International, Inc. (“Dyadic”, or the “Company”) (NASDAQ: DYAI) a global biotechnology company focused on further improving, applying and deploying its proprietary C1-cell protein production platform to accelerate development, lower production costs and improve the performance of biologic vaccines and drugs at flexible commercial scales, today announced that the Company’s CEO Mark Emalfarb will be presenting at the upcoming 2022 BIO CEO & Investor Conference being held at the Marriott Marquis New York City February 14<sup>th</sup> -15<sup>th</sup>, and virtually through the 17<sup>th</sup>.

Presentation Title, “*Revolutionary C1 Protein Production Platform, Addressing Current Vaccine & Therapeutic Access & Affordability Using the Science of Tomorrow, Today*”

Presentation will be available on demand during the conference February 14 - 17, 2022

Event Link: <https://www.bio.org/events/bio-ceo-investor-conference/sessions/882391>

Event platform link (available to registered attendees only after February 11<sup>th</sup>): <https://bioceoandinvestorconference22.hubb.me/fe/schedule-builder/sessions/882391>

Dyadic management will be available during the event for one-on-one meetings. Interested parties may request a one-on-one meeting at [hzosiak@dyadic.com](mailto:hzosiak@dyadic.com) or contact Dyadic at (561) 743-8333.

### **About Dyadic International, Inc.**

Dyadic International, Inc. is a global biotechnology company that is developing what it believes will be a potentially significant biopharmaceutical gene expression platform based on the fungus *Thermothelomyces heterothallica* (formerly *Myceliophthora thermophila*), named C1. The C1 microorganism, which enables the development and large-scale manufacture of low-cost proteins, has the potential to be further developed into a safe and efficient expression system that may help speed up the development, lower production costs and improve the performance of biologic vaccines and drugs at flexible commercial scales. Dyadic is using the C1 technology and other technologies to conduct research, development and commercial activities for the development and manufacturing of human and animal vaccines and drugs, such as virus like particles (VLPs) and antigens, monoclonal antibodies, Fab antibody fragments, Fc-Fusion proteins, biosimilars and/or biobetters, and other therapeutic proteins. Certain other research activities are ongoing, which include the exploration of using C1 to develop and produce certain metabolites and other biologic products. Dyadic pursues research and development collaborations, licensing arrangements and other commercial opportunities with its partners and collaborators to leverage the value and benefits of these technologies in development and manufacture of biopharmaceuticals. As the aging population grows in developed and undeveloped countries, Dyadic believes the

C1 technology may help bring biologic vaccines, drugs, and other biologic products to market faster, in greater volumes, at lower cost, and with new properties to drug developers and manufacturers, and improve access and cost to patients and the healthcare system, but most importantly save lives.
