

## **INVO Fertility Announces a 1:3 Reverse Stock Split Effective Pre-Market Opening on July 21, 2025**

SARASOTA, Fla., July 17, 2025 (GLOBE NEWSWIRE) — INVO Fertility, Inc. (“INVO”) (NASDAQ: IVF), a healthcare company focused on the fertility market, announced today that it will effect a 1-for-3 reverse split of its issued and outstanding and authorized common stock effective as of 12:01 a.m. Eastern Time on July 21, 2025. Commencing with the opening of trading on The Nasdaq Capital Market on July 21, 2025, the Company’s common stock will trade on a post-split basis under the same trading symbol, “IVF”.

As a result of the reverse stock split, the CUSIP number for the Company’s common stock will be 44984F708. As a result of the reverse stock split, every 3 shares of issued and outstanding common stock will be exchanged for 1 share of common stock, with any fractional shares being rounded up to the next higher whole share. Immediately after the reverse stock split becomes effective, the company will have approximately 928,272 shares of common stock issued and outstanding. In addition, a proportionate adjustment will be made to the company’s authorized shares of common stock such that the Company shall have 1,388,888 shares of authorized common stock after the effective time of the reverse stock split.

The reverse stock split is primarily intended to bring the Company into compliance with Nasdaq’s \$1.00 per share minimum bid price requirement for continued listing. However, no assurance can be given that such reverse stock split will enable the Company to regain compliance with the Nasdaq minimum bid price requirement.

### **About INVO Fertility**

We are a healthcare services fertility company dedicated to expanding assisted reproductive technology (“ART”) care to patients in need. Our principal commercial strategy is focused on building, acquiring and operating fertility clinics, including “INVO Centers” dedicated primarily to offering the intravaginal culture (“IVC”) procedure enabled by our INVOcell<sup>®</sup> medical device (“INVOcell”) and US-based, profitable in vitro fertilization (“IVF”) clinics. We have two operational INVO Centers in the United States and one IVF clinic. We also continue to engage in the sale and distribution of our INVOcell technology solution into third-party owned and operated fertility clinics. The INVOcell is a proprietary and revolutionary medical device, and the first to allow fertilization and early embryo development to take place in vivo within the woman’s body. The IVC procedure provides patients with a more natural, intimate, and affordable experience in comparison to other ART treatments. We believe the IVC procedure can deliver comparable results at a fraction of the cost of traditional IVF and is a significantly more effective treatment than intrauterine insemination (“IUI”).
