About INVO Fertility

We are a healthcare services fertility company dedicated to expanding access to assisted reproductive technology ("ART") care to patients in need. Our principal commercial strategy is focused on building, acquiring, and operating fertility clinics, including "INVO Centers" dedicated primarily to offering the intravaginal culture ("IVC") procedure enabled by our INVOcell® medical device ("INVOcell") and US-based, profitable in vitro fertilization ("IVF") clinics. We have two operational INVO Centers in the United States and one IVF clinic. We also continue to engage in the sale and distribution of INVOcell to third-party owned and operated fertility clinics. INVOcell is a proprietary and revolutionary medical device, and the first to allow fertilization and early embryo development to take place *in vivo* within the woman's body. The IVC procedure provides patients with a more connected, intimate, and affordable experience in comparison to other ART treatments. We believe the IVC procedure can deliver comparable results at a fraction of the cost of traditional IVF and is a significantly more effective treatment than intrauterine insemination.
