IPM Provides Secure, Scalable, and Expertly Managed IT Services to More Effectively Onboard the Private Equity Clients of IT Ally

JERICHO, NY / ACCESS Newswire / May 28, 2025 / Intelligent Protection Management Corp. ("IPM") (Nasdaq:IPM), a managed technology solutions provider focused on cybersecurity and cloud infrastructure, announced today the initiation of a collaboration with IT Ally, a trusted business and technology services provider to lower middle-market private equity firms and their portfolio companies.

Working together, IPM and IT Ally deliver seamless, end-to-end tech solutions for private equity firms and their portfolio companies, with the goals of preserving value and mitigating risk. IT Ally sets the strategy, aligning IT with business goals and managing cybersecurity, compliance, and tech risks, while IPM brings the strategy to life with secure, scalable, and expertly managed IT services.

Jason Katz, CEO of IPM, said, "Many of IT Ally's private equity customers are involved in highly regulated markets, including finance, legal, healthcare and merchant processing, requiring IT platforms that demand high-end security, scalability, and operational requirements. IPM delivers not only an IT solution, but a solution targeted to the industries in which these highly regulated businesses operate. IPM drives the technology platform that allows IT Ally's client base to operate seamlessly and efficiently.

"We are pleased to be working with IPM to provide our customers with the leading-edge technology to meet their growth and regulatory needs," said Michael Fillios,

Founder and CEO of IT Ally. "We believe that successful onboarding of new clients sets the stage for long and mutually beneficial relationships. IPM leads the way in that regard. We look forward to working with the IPM team."
