About Kiora Pharmaceuticals

Kiora Pharmaceuticals is a clinical-stage biotechnology company developing products for the treatment of orphan retinal diseases. KIO-301 is being developed for the treatment of Retinitis Pigmentosa, and Kiora also plans to develop KIO-301 for Choroideremia and Stargardt disease. It is a molecular photoswitch that has the potential to restore vision in patients with inherited and/or age-related retinal degeneration. Kiora also plans to develop KIO-104 for the treatment of posterior non-infectious uveitis. This small molecule is a next-generation, non-steroidal, immuno-modulatory Dihydroorotate Dehydrogenase (DHODH) inhibitor with what Kiora believes is best-in-class potency.
