

## **LiqTech Receives \$120,000 Order For A Water Treatment System For Flue Gas Condensate**

BALLERUP, Denmark, Jan. 17, 2017 — **LiqTech International, Inc. (NYSE MKT: LIQT) (“LiqTech”)** is pleased to announce that the Company has received a \$120,000 order for the Company’s water treatment systems for flue gas condensate. The order was received from Tjæreborg Industri A/S, a Danish company who specializes in the development and manufacturing of equipment for power plants. The system will be installed at Uldum Varmeværk, Denmark.

Mr. Sune Mathiesen, LiqTech CEO, remarked, “This is the third order in less than two months for water treatment for power plants. The series of orders confirms the market’s acceptance and demand of our unique solution. We offer an unmatched combination of performance, robustness and price based on our water treatment solutions.”

“This is the second order from Tjæreborg Industries, and we are pleased to integrate our water treatment system with their plant design. The water treatment system will clean the flue gas condensate for safe discharge to sewage – well below legislation limits,” Mr. Mathiesen concluded.

### **About LiqTech International**

LiqTech International, Inc., a Nevada corporation, is a clean technology company that for more than a decade has developed and provided state-of-the-art technologies for gas and liquid purification using ceramic silicon carbide filters, particularly highly specialized filters for the control of soot exhaust particles from diesel engines and for liquid filtration. Using nanotechnology, LiqTech develops products using proprietary silicon carbide technology. LiqTech’s products are based on unique silicon carbide membranes, which facilitate new applications and improve existing technologies. In particular, LiqTech Systems A/S ([www.provital.dk](http://www.provital.dk)), the Company’s subsidiary, has developed a new standard of water filtration technology to meet the ever increasing demand for higher water quality. By incorporating LiqTech’s SiC liquid membrane technology with its longstanding systems design experience and capabilities it offers solutions to the most difficult water pollution problem.
