

LiqTech Receives \$350,000 Order From DuPont For A Water Treatment System For Flue Gas Condensate

BALLERUP, Denmark, Dec. 13, 2016 — **LiqTech International, Inc. (NYSE MKT: LIQT) (“LiqTech”)** is pleased to announce that the Company has received a \$350,000 order for the Company’s water treatment systems for flue gas condensate. The order was received from DuPont and will be installed at their facility in Grindsted, Denmark.

Mr. Sune Mathiesen, LiqTech CEO, remarked, “We have invested significant resources in developing a standardized system for the treatment of flue gas condensate. Our technology has proven to be well suited for this challenging application and we are very pleased to note that our product is gaining still more interest and acceptance from the industry.”

“This is the fourth order this year for this application and we are pleased that it came from DuPont who is a large player in the global industry,” Mr. Mathiesen concluded.

Mr. Steffen Bendstrup, DuPont Team Leader, remarked, “We are very happy to work with LiqTech on this project. They have a proven technology and based on their prior experience they were able to provide us with the necessary process guarantees. When the system is installed it will remove heavy metals before discharge. In the future we have the opportunity to further add a reverse osmosis system, which will allow us to reuse the water.”

“We have been very pleased with the responsiveness and technical advice from LiqTech and we look forward to our continued cooperation,” Mr. Bendstrup concluded.

ABOUT LIQTECH INTERNATIONAL, INC.

LiqTech International, Inc., a Nevada corporation, is a clean technology company that for more than a decade has developed and provided state-of-the-art technologies for gas and liquid purification using ceramic silicon carbide filters, particularly highly specialized filters for the control of soot exhaust particles from diesel engines and for liquid filtration. Using nanotechnology, LiqTech develops products using proprietary silicon carbide technology. LiqTech’s products are based on unique silicon carbide membranes which facilitate new applications and improve existing technologies. In particular, LiqTech Systems A/S (www.provital.dk), the Company’s subsidiary, has developed a new standard of water filtration technology to meet the ever increasing demand for higher water quality. By incorporating LiqTech’s SiC liquid membrane technology with its longstanding systems design experience and capabilities it offers solutions to the most difficult water pollution problem.
