About Modular Medical, Inc.

Modular Medical, Inc. (NASDAQ:MODD) intends to launch the first next generation of insulin delivery technology that will be both affordable and simple enough to learn and use to transform the insulin pump market into a mass market. Our patented technologies will eliminate the tradeoff between complexity and efficacy and seek to set new standards for insulin dosing that most closely mimics nature. Our mission is to improve access to the highest standards of glycemic control for people with diabetes taking it beyond “superusers” and providing “diabetes care for the rest of us.”

Modular Medical was founded by Paul DiPerna, a seasoned medical device professional and renowned microfluidics engineer. Prior to founding MODD, Mr. DiPerna was the founder (in 2005) of Tandem Diabetes (TNDM) and invented and designed its t:slim insulin pump.
