

## **Reliq Health Technologies, Inc. Announces New Contract with digiiMED to Provide its iUGO Care Platform to Patients in Puerto Rico**

HAMILTON, Ontario, July 15, 2020 — **Reliq Health Technologies Inc. (TSXV:RHT or OTCQB:RQHTF) (“Reliq” or the “Company”)**, a technology company focused on developing innovative mobile health (mHealth) and telemedicine solutions for Community-Based Healthcare, today announced that it has signed a contract with digiiMED, LLC to provide Reliq’s iUGO Care Remote Patient Monitoring (RPM), Chronic Care Management (CCM), Behavioral Health Integration (BHI) and Principal Care Management (PCM) platform to digiiMED’s Medicare and private insurance patients in Puerto Rico.

“We are very excited to be expanding our business into Puerto Rico, a US territory with a population of over 3 million people,” said Dr. Lisa Crossley, CEO of Reliq Health Technologies, Inc. “Half of all adults in Puerto Rico have at least one chronic condition, over 42% percent of the population have hypertension and over 16% suffer from diabetes. In the midst of a global pandemic that is overwhelming healthcare systems in States like Texas, Florida and Georgia, it is vital that areas like Puerto Rico protect their high risk chronic disease populations through virtual care programs like iUGO Care’s RPM, CCM, BHI and PCM. Keeping chronic disease patients healthy and at home reduces the risk of exposure to the virus for this vulnerable group, limiting the spread of the virus in the total population and helping to keep the healthcare system functioning for all of the citizens of Puerto Rico. Many communities in Puerto Rico face infrastructure challenges similar to those we address with our remote and rural clients in Canada and the US, such as lack of conventional internet connections and limited access to in-home care, so Reliq is uniquely positioned to meet the needs of this market. digiiMED is a leading healthcare solution provider in Puerto Rico with a proven understanding of the local market and an extensive network of care providers and patients on the island. We look forward to working with the digiiMED team to improve access to care and health outcomes for their clients’ chronic disease patients.”

“At digiiMED, our goal is to bring improvements to the health and well being of the people of Puerto Rico,” said Jose Alvarez, CEO of digiiMED and Surgical Solutions Puerto Rico. “Through our existing contracts with healthcare providers on the island we have access to over 200,000 chronic disease patients who will benefit greatly from Reliq’s iUGO Care Remote Patient Monitoring (RPM), Chronic Care Management (CCM), Behavioral Health Integration (BHI) and Principal Care Management (PCM) solutions. We selected Reliq as our technology partner and iUGO Care as the software platform for our clients after an extensive review of all commercially available digital health solutions. Reliq’s iUGO Care platform has the most comprehensive capabilities of any virtual care software solution, but is also intuitive and easy to use for both clinicians and patients. Reliq’s highly qualified, experienced clinical team was able to help us develop a customized Care Management program that will meet the specific needs of our client populations. Having access to Reliq’s existing Spanish-speaking Care

Management and Implementation teams in Texas and Florida will enable digiiMED to onboard physicians and patients immediately while we expand our own customer support team in Puerto Rico.”

### **About digiiMED**

digiiMED is a spin-off of Surgical Solutions Puerto Rico. digiiMED provides innovative digital health solutions to care providers in Puerto Rico and Latin America. Surgical Solutions has been working with primary care physicians, neurosurgeons, orthopedic surgeons and other healthcare professionals in Puerto Rico and Latin America since 2003. The company has experienced double digit growth year over year for the past ten years and has over 25% market share in Puerto Rico in the Spine, Trauma, Thoracic, CMF, Intra Operative Neuro Monitoring and Orthopaedic Surgeries Market.
