

## **Reliq Health Technologies Places Order for 27,500 Blood Pressure and Glucose Monitoring Devices to Improve Hardware Availability for iUGO Care Customers**

VANCOUVER, British Columbia, May 28, 2018 — **Reliq Health Technologies Inc.** (TSXV:RHT) (OTCQB:RQHTF) (“**Reliq**” or the “**Company**”), a technology company that develops innovative mobile health (mHealth) and telemedicine solutions for the Community-Based Healthcare market, is pleased to announce that it has placed an order for 27,500 blood glucose + blood pressure monitoring devices to address the hardware availability issues recently faced by its iUGO Care customers.

“Over the last several months our customers in Texas have been unable to secure the monitoring devices they have selected for their patients due to extremely high demand for the units,” said Dr. Lisa Crossley, CEO of Reliq Health Technologies, Inc. “Since our clients are not able to onboard patients to our platform without the hardware, we felt that deploying some of our capital to secure the devices necessary to meet the demand from our current contracts was a very worthwhile investment. Placing a large order like this allowed us to negotiate pricing that will generate new profits for Reliq through the sale of this hardware to our customers, while still reducing our clients’ total purchasing costs.”

“We see our relationship with our customers as a true partnership,” said Giancarlo De Lio, Chief Customer Experience Officer at Reliq Health. “We are committed to doing everything we can as a company to ensure our clients’ success. Their reaction to our decision to step up and secure a supply of these devices to meet their needs has been extremely positive. We look forward to helping our clients continue to deliver high quality care in the home to chronic disease patients in underserved communities.”

Reliq Health Technologies is a healthcare technology company that specializes in developing innovative software solutions for the Community Care market. Reliq’s powerful iUGO Care platform supports care coordination and community-based healthcare. The iUGO Care platform integrates wearables, sensors, voice technology and intuitive mobile apps and desktop user interfaces for patients, clinicians and healthcare administrators. iUGO Care allows complex patients to receive high quality care at home, improving health outcomes, enhancing quality of life for patients and families and reducing the cost of care delivery. iUGO Care provides real-time access to remote patient monitoring data, allowing for timely interventions by the care team to prevent costly hospital readmissions and ER visits. Reliq Health Technologies trades on the TSX Venture under the symbol RHT and on the OTCQB as RQHTF.

ON BEHALF OF THE BOARD

“Dr. Lisa Crossley”
