

Scientific Industries Launches New Products

BOHEMIA, N.Y., Aug. 22, 2016 — Scientific Industries Inc. (OTCBB:SCND), the world leader in vortexing technologies, announced today the worldwide release of its Mini Orbital-Genie product line. The new Mini Orbital-Genie products are comprised of 4 different low-profile compact shakers for general research laboratory applications.

The new line of shakers includes a slow-speed shaker which can double or triple its capacity using a newly developed stacking tray accessory and three models of a compact high-speed orbital shaker, one of which features ratcheting clamps that can hold virtually any type of laboratory vessel.

“With the addition of these new orbital shakers, we now have a more robust line of GENIE products providing solutions for most mixing and shaking needs of our customers,” commented Ms. Helena R. Santos, President and Chief Executive Officer.

About Scientific Industries

Scientific Industries designs, manufactures, and markets a variety of laboratory equipment, including the world-renowned Vortex-Genie® 2 Mixer and balances; produces and sells customized catalyst research instruments and the research, development and production of bioprocessing systems and methods. Scientific Industries’ products are generally used and designed for research purposes in laboratories of universities, hospitals, pharmaceutical companies, chemical companies, and medical device manufacturers.
