

SenesTech Announces Pricing of Public Offering of Common Stock and Warrants to Purchase Common Stock

FLAGSTAFF, Ariz., Nov. 17, 2017 — SenesTech, Inc. (NASDAQ: SNES), a developer of proprietary technologies for managing animal pest populations through fertility control, today announced that it has priced its underwritten public offering of 5,400,000 shares of common stock and warrants to purchase 4,050,000 shares of common stock at a price of \$1.00 per share, including the warrants. The warrants will have an exercise price of \$1.50 per share, are exercisable immediately and will expire five years from the date of issuance. The gross proceeds to SenesTech from this offering are expected to be approximately \$5,400,000, before deducting underwriting discounts, commissions and other estimated offering expenses. SenesTech has granted the underwriters a 30-day option to purchase up to an additional 810,000 shares of Common Stock and warrants to purchase 607,500 shares of common stock to cover over-allotments, if any. The offering is expected to close on November 21, 2017, subject to customary closing conditions.

SenesTech's common stock is listed on The NASDAQ Capital Market under the symbol "SNES." A registration statement on Form S-1 relating to these securities has been filed with the Securities and Exchange Commission and became effective on November 16, 2017.

Roth Capital Partners acted as the sole book-runner for the offering with Craig-Hallum Capital Group acting as co-manager. Copies of the registration statement and any prospectus or prospectus supplement related to the offering may be obtained from Roth Capital Partners, LLC, 888 San Clemente, Newport Beach, CA 92660, (800) 678-9147 or by accessing the SEC's website, www.sec.gov.

This press release does not constitute an offer to sell or a solicitation of an offer to buy the securities described herein, nor shall there be any sale of these securities in any state or other jurisdiction in which such an offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. The offering may be made only by means of an effective registration statement and prospectus.

About SenesTech

SenesTech has developed an innovative technology for managing animal pest populations

through fertility control as opposed to a lethal approach.

ContraPest's novel technology and approach targets the reproductive capabilities of both sexes in rat populations, inducing egg loss in female rats and impairing sperm development in males. Using a proprietary bait delivery method, ContraPest is dispensed in a highly palatable liquid formulation that promotes sustained consumption by rat communities. ContraPest is designed, formulated and dispensed to be low hazard for handlers and non-target species such as wildlife, livestock and pets, where the active ingredients break down rapidly, unlike rodenticides. In contrast, the historical approach to managing rat pest populations, rodenticides, carries a high risk of environmental contamination and the poisoning of non-target animals, pets and children. ContraPest is a Restricted Use product.

SenesTech believes its innovative non-lethal approach, targeting reproduction, is more humane, less harmful to the environment, and more effective in providing a sustainable solution to pest infestations than traditional lethal pest management methods. SenesTech believes ContraPest[®] will establish a new paradigm in rodent control, resulting in improved performance in rodent control over rodenticides, without the negative environmental effects of rodenticides.
