SenesTech Expands into Warehousing and Distribution Sector with Multi-Pallet Initial Shipment of Evolve Rodent Birth Control™

PHOENIX, Ariz., Feb. 18, 2025 — SenesTech, Inc. (NASDAQ: SNES, “SenesTech”), a pioneer in humane rodent pest control solutions, is pleased to announce the shipment of a substantial order of its Evolve™ Rodent Birth Control product to one of the largest warehousing and distribution companies in the Midwest. This marks SenesTech’s entry into the warehousing and distribution sector, with the unnamed customer planning to implement Evolve Rodent Birth Control™ within their own facilities and distribute it through their extensive network.

The warehousing industry in the United States encompasses more than 18 billion square feet of industrial and logistics real estate, reflecting its critical role in the nation’s supply chain infrastructure.

This development aligns with SenesTech’s strategic initiative to broaden its market reach, offering innovative, non-lethal rodent control solutions to industries where traditional rodent pest control methods pose significant challenges.

“Controlling rodent infestations in facilities that store food supplies presents unique challenges, as the use of traditional poisons is often not feasible due to safety concerns, and the facilities comprise millions of square feet of managed space,” said Joel Fruendt, President and CEO of SenesTech. “Evolve Rodent Birth Control offers a humane and effective alternative, ensuring the integrity of stored products while maintaining compliance with industry regulations. We are excited to partner with leaders in the warehousing and distribution sector to enhance their pest management strategies.”

About SenesTech, Inc.
SenesTech is committed to creating healthier environments by humanely managing animal pest populations through fertility control. The company’s groundbreaking products, including Evolve™ rodent birth control, integrate seamlessly into pest management programs, significantly enhancing their effectiveness while reducing reliance on traditional poisons. SenesTech’s mission is to create cleaner cities, more efficient businesses, and healthier communities with products that are humane, effective, and sustainable.

Safe Harbor Statement

This press release contains “forward-looking statements” within the meaning of federal securities laws, and we intend that such forward-looking statements be subject to the safe harbor created thereby. Such forward-looking statements include, among others, our strategic initiative to broaden our market reach, offering innovative, non-lethal rodent control solutions to industries where traditional rodent pest control methods pose significant challenges.

Forward-looking statements may describe future expectations, plans, results, or strategies and are often, but not always, made through the use of words such as “believe,” “may,” “future,” “plan,” “will,” “should,” “expect,” “anticipate,” “eventually,” “project,” “estimate,” “continuing,” “intend” and similar words or phrases. You are cautioned that such statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those reflected by such forward-looking statements. Such factors include, among others, the successful commercialization of our products; market acceptance of our products; our financial performance, including our ability to fund operations; our ability to maintain compliance with Nasdaq’s continued listing requirements; regulatory approval and regulation of our products; and other factors and risks identified from time to time in our filings with the Securities and Exchange Commission, including our Annual Report on Form 10-K for the fiscal year ended December 31, 2023. All forward-looking statements contained in this press release speak only as of the date on which they were made and are based on management’s assumptions and estimates as of such date. Except as required by law, we do not undertake any obligation to publicly update any forward-looking statements, whether as a result of the receipt of new information, the occurrence of future events or otherwise.
