

Shuttle Pharmaceuticals to Ring Nasdaq Opening Bell on Wednesday, January 18, 2023

ROCKVILLE, Md., Jan. 17, 2023 — Shuttle Pharmaceuticals Holdings, Inc. (Nasdaq: SHPH), a discovery and development stage specialty pharmaceutical company focused on improving the outcomes of cancer patients treated with radiation therapy (RT), today announced that Chairman and Chief Executive Officer, Anatoly Dritschilo, M.D., CEO, and other Shuttle Pharmaceuticals team members will ring the Nasdaq opening bell on Wednesday, January 18, 2023.

“Shuttle is excited to open the Nasdaq tomorrow morning to commemorate our recent IPO and the advancement of our lead product candidate aimed at improving the outcomes of cancer treatment through radiation therapy while reducing its side effects,” commented Shuttle Pharma’s Chairman and CEO, Anatoly Dritschilo, M.D. “We are excited about developing our platform of radiation sensitizers and the future opportunities it will bring as we work through our milestones and look to deliver innovative new treatments to thousands of patients who currently lack effective therapies.”

The Opening Bell ceremony will be broadcast live starting at 9:15 a.m. Eastern Time from the Nasdaq MarketSite Tower in New York City, New York. To view the broadcast, please visit: <https://www.nasdaq.com/marketsite/bell-ringing-ceremony>.

About Shuttle Pharmaceuticals

Founded in 2012 by faculty members of the Georgetown University Medical Center, Shuttle Pharmaceuticals is a discovery and development stage specialty pharmaceutical company focused on improving the outcomes for cancer patients treated with radiation therapy (RT). Our mission is to improve the lives of cancer patients by developing therapies that are

designed to maximize the effectiveness of RT while limiting the side effects of radiation in cancer treatment. Although RT is a proven modality for treating cancers, by developing radiation sensitizers, we aim to increase cancer cure rates, prolong patient survival and improve quality of life when used as a primary treatment or in combination with surgery, chemotherapy and immunotherapy.
