VANCOUVER, BC, Aug. 29, 2023 /CNW/ — Zoomd Technologies Ltd. (TSXV: ZOMD) (OTC: ZMDTF) and its wholly owned subsidiary Zoomd Ltd. (collectively, “**Zoomd**” or the “**Company**”), the marketing technology (MarTech) user-acquisition and engagement platform, today reported its financial results for the three months ended June 30, 2023. The Company’s financial statements and management discussion and analysis (“**MD&A**”) are available on SEDAR under the Company’s profile. All currency references in this press release are in USD.

Financial Highlights

- Revenues in 2Q23 were \$8.8M, and gross profit margin was 36%.
- The revenue reflects a decline of 46% relative to 2Q22 and an increase of roughly 700 bps in gross profit margin. The driving factors behind these changes are primarily the decline in the crypto sector, which carried high revenue volume with lower than average gross profit.
- Revenues increased 2% relative to 1Q23, and management believes that revenues have begun to reach stabilization.
- Adjusted EBITDA^[1] was \$0.4M in 2Q23.
- Ended 2Q23 with a cash balance of \$2M and no long-term debt.

Management Commentary

Ido Almany, Chief Executive Officer of Zoomd Technologies, stated: “We are pleased to announce the Q2 results for Zoomd, showcasing our commitment to adaptability and resilience amidst a dynamic business landscape. In this quarter, we have taken strategic actions to optimize our operations, foster efficiency, and concentrate on our core business, setting the stage for sustained growth in the coming quarters.

Management is diligently implementing the corporate restructuring plan that was announced in early June. As previously reported, the cost reductions, which extend beyond headcount adjustments, are projected to result in annual savings of approximately \$4 million. In addition to these cost savings, we have announced the discontinuation of several non-profitable and low-potential business lines. This strategic decision allows us to reallocate efforts and resources towards Zoomd’s core business. Notably, these initiatives have already begun yielding promising outcomes, as evidenced by stabilizing revenue trends. Q2 revenues and Adjusted EBITDA demonstrated an increase over Q1, underscoring the effectiveness of our strategic measures.

While these measures are already showing positive signs, it’s important to acknowledge that the full spectrum of their impact is yet to be realized. Our dedication to long-term success remains steadfast, and we are confident that as these efforts continue to unfold, we will be well-equipped to steer the company through the prevailing macroeconomic challenges and the rapid technological transformations that define our industry.”

Amit Bohensky, Chairman of Zoomd Technologies, stated, “Navigating the complexities of today’s business environment demands not only vision but also adaptability and foresight. As we persist in aligning our strategies with evolving market dynamics, we assure our stakeholders that we have strong hands at the helm. Our leadership team is unwavering in its commitment to harness the potential of our strategic measures and leverage our collective expertise to guide Zoomd into a future defined by innovation and sustainable growth.”

Second Quarter 2023 Highlights

- Revenues for the three months ended June 30, 2023, were \$8.8 million, a 46% decline relative to 2Q22. The decrease in revenues is primarily a result of global macroeconomic conditions that impact client advertising budgets in general and specifically in areas of Fintech and in particular Cryptocurrency. Due to the fluctuating budgets of the Fintech and Cryptocurrency sectors, we continue to diversify our business by increasing our exposure to sectors such as E-commerce, iGaming, and CPG companies. Revenues in 2Q23 increased by 2% relative to 1Q23.
- Gross profit margin was 36% for the three months ended June 30, 2023, versus 29% for the same period last year, reflecting lower revenues from the cryptocurrency segment which carries lower margins.

- Research and Development expenses for the three months ended June 30, 2023, were \$1M, a 38% decrease relative to 2Q22, reflecting lower depreciation and other R&D expenses.
- Selling, General, and Administrative expenses for the three months ended June 30, 2023, were \$2.8M, a 10% decrease YOY, reflecting the decrease in revenues.
- Adjusted EBITDA for the three months ended June 30, 2023, was \$0.4M as compared with Adjusted EBITDA of \$1.6M for the three months ended June 30, 2022, reflecting the decrease in revenues. Adjusted EBITDA increased relative to the three months ended March 31 by \$0.2M.
- Operating loss was \$0.6M for 2Q23, compared to an operating profit of \$0.1M in 2Q22, and was primarily attributed to the decrease in revenues.
- As of June 30, 2023, the Company's cash and cash equivalents amounted to \$2 million, and no long-term debt.
